data engineering & analytics	customer profiles managed	data formatting anomalies	operational debugging time

PROFILE

Data Engineer and Analyst with 3+ years of experience on Microsoft Azure. I build reliable ETL/ELT pipelines with Data Factory, Synapse, Microsoft Fabric and Databricks, and turn the data into dashboards and insights with SQL, Power BI, Tableau, Excel and Python (pandas). Experienced in medallion architecture, data quality, data modeling, statistics and KPI reporting, with CI/CD in Azure DevOps and Agile delivery.

EXPERIENCE

Data Engineer
Nov 2025 – Apr 2026

Itransition Group · Warsaw, Poland

`Microsoft Fabric Data Migration & Analytics Platform`

- Developed data integration pipelines with **Azure Data Factory** and **Microsoft Fabric** for cloud analytics.
- Migrated datasets from Azure SQL and Azure Data Lake into **Fabric OneLake** for central reporting.
- Transformed data with **Databricks** and **PySpark**; built Power BI datasets; ran monitoring, deployment and version control in **Azure DevOps**.

Full-time Master's studies
Oct 2024 – Mar 2026

Vistula University · Warsaw · Applied Data Science, studied full-time between roles

Data Engineer
Dec 2022 – Aug 2024

ExcelR Solutions · Bengaluru, India

`Operational Data Warehouse & Reporting Automation`

- Designed, optimised and monitored **SQL Server** databases with complex queries and stored procedures for **1.2 million** customer profiles.
- Built automated data profiling scripts (uniqueness, completeness) that cut record formatting anomalies by **45%**.
- Built self-serve KPI layers for Power BI; Git-tracked automation logs cut debugging time by **35%**.

`Cloud Data Integration & Analytics Platform`

- Developed ADF pipelines from multiple sources into **ADLS** and **Synapse**; cleaned and enriched data with Databricks and PySpark.
- Built dimensional tables, tuned SQL, and validated data with **Delta Lake**, **Unity Catalog** and **PyDeequ** before production.

Data Analyst
Mar 2020 – Oct 2022

HN Techno · Ahmedabad, India

`Business Intelligence Data Warehouse`

- Developed ADF pipelines loading multiple source systems into **Azure Synapse Analytics**.
- Wrote SQL transformations and validation logic; built **Power BI** dashboards for operational KPIs.
- Managed source control and deployments in Azure DevOps; monitored jobs and fixed ETL failures.

SKILLS

`// data engineering`

Azure Data Factory · Microsoft Fabric · Azure Databricks · Synapse Analytics · PySpark · Delta Lake · ADLS Gen2 · ETL / ELT · Medallion · CDC · Event Hubs · Stream Analytics · SCD Type 1 & 2 · Unity Catalog · PyDeequ

`// analytics & bi`

Power BI · DAX · Tableau · Excel · Power Query · pandas · Statistics · Data modeling · Semantic models · KPI reporting

`// languages`

SQL · Python · T-SQL · Spark SQL · Shell / Linux

`// devops & automation`

Azure DevOps · Git / GitHub · CI/CD · Logic Apps · n8n · OpenAI API

EDUCATION

Master's in Computer Science, Applied Data Science

Vistula University, Warsaw

Oct 2024 – Mar 2026
